

SPRINT - 1

Date	29 October 2022
Team ID	PNT2022TMID25068
Project Name	Smart Waste Management System for Metropolitan cities

OBJECTIVE:

A 24×7 monitoring system is designed for monitoring dumpsters. The ultrasonic sensor is used for measuring the level of waste in the dustbin. The DC motor powered platform is used for segregating wet and dry waste. The IR sensor and moisture sensor is used for separating wet and dry waste. If either of the containers is full then an alert message is sent from the dustbin to garbage collector and the cloud. In turn, based on the allotment garbage collector can clear the corresponding dumpster.

Cloud Foundry - IBM Cloud

cloud.ibm.com/cloudfoundry/overview

IBM Cloud Search resources and products... Catalog Manage Jenis F's Account

Cloud Foundry

Public

Deploy and run your applications without managing servers or clusters with IBM Cloud Foundry

Cloud Foundry automatically transforms source code into containers, scales them on demand, and manages user access and capacity.

Cloud Foundry in the IBM Cloud

Public Applications

Create and deploy apps on IBM Cloud's multi-tenant Cloud Foundry environment available in 5 IBM Cloud Regions. Get started in minutes by deploying your applications, and let IBM Cloud manage them for you.

Waiting for 684d0d47.akstatic...

IBM Cloud Foundry Public is being deprecated. Please see [full details](#).
